EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: The prior art fails to disclose or reasonably suggest a wavelength converter operating by wideband four-wave mixing comprising a laser diode, an optical modulator, first and second polarization controllers, a semiconductor optical amplifier, and three distinct tunable lasers, wherein these elements are arranged as shown in FIGURE 1 of the present application. The first tunable laser generates a first pump signal having a first wavelength and thus helps determine a required conversion range; the second tunable laser generates a second pump signal having a second wavelength and thus helps determine the required conversion wavelength; and the third tunable laser generates an assist beam having a third wavelength, this assist beam improving the recovery rate and saturation power of the semiconductor optical amplifier. While the prior art discloses wideband optical wavelength converters operating by four-wave mixing (see the three cited references to Aso et al), and while the prior art also discloses semiconductor optical amplifier-based optical wavelength converters operating by four-wave mixing (see the cited Kim et al reference), a wavelength converter comprising the specific elements recited above is *not* known in the prior art. Claims 1-18 herein are therefore allowed.

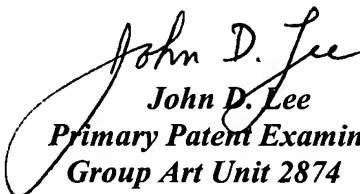

All of the prior art documents cited by applicant in the Information Disclosure Statement filed with the application on February 9, 2004, have been considered and made of record. Note the attached initialed copy of form PTO-1449. These references disclose bits and pieces of the claimed wavelength converter, but do not disclose a

converter comprising all of the specific elements recited above. It is noted that the December 2003 publication listed on the attached form PTO-1449 is applicants' own publication and not available for use as a reference against the claims herein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
